LowkeyFX APA Strategy Trading Robot Installation Guide

Here is a simple step by step guide to install our APA Strategy Trading Robot on your MT5 Desktop app.

Step 1: Put the downloaded trading robot file into MT5

1. Find your extracted `APA Trading Robot` file on your computer. Right-click it and select **Copy**.
2. Open MetaTrader 5 app on your computer/laptop. Click **File** in the very top-left corner, then click **Open Data Folder**.
3. In the folder window that pops up, double-click **MQL5**, then double-click **Experts**. Right-click inside that empty space and select **Paste**. Close that window.
4. Go back to the MetaTrader 5 app on your computer. On the left side of your screen, look for the **Navigator** box. Right-click the words "**Expert Advisors"** and click **Refresh**. The APA trading robot will now appear in the list.

Step 2: Set Up Your Chart and Start the trading robot

1. Look at the **Market Watch** list on the left (where currency names are). Click and hold the Deriv synthetic indices or currency pair you want the robot to be trading automatically for you, drag and drop it on the middle of the screen.
2. Look at the top toolbar of MT5 and click your desired timeframe (like **M15** or **H1**).
3. Click the **Algo Trading** button at the top of your screen to **turn green**.
4. Drag your trading robot from the Navigator box on the left and drop it right onto your main chart.
5. A settings box will pop up:

- Click the **Common** tab and check the box that says **"Allow Algo Trading"**.
- Click the **Inputs** tab and enter the activation **License Key** you received from our Admin
- Enter your preferred risk % per trade based on your risk appetite **(we highly recommend you start with 5% and increase it gradually as time goes on based on your risk appetite)**
- Click **OK** to save the settings and the trading robot will be successfully activated and ready to start trading automatically for you.

You will now see a small **blue icon** in the top-right corner of your chart and this means that your trading robot is now active and running successfully.
